

Technology is propelling our growth. We're focusing on technologies that improve our production and finishing so that our customers get products which have unique finish and yet very comfortable to the pocket. We also are investing in the development of emerging technologies – such as finding better ways to to give good finishes to steel.

We recognize that the world needs all the products we can develop, in every potential form. Our employees work daily to find newer, cleaner ways to produce them for the world.
